

DATA SHEET

DAT-MAIL™ MSP

E-DOCUMENTATION SOLUTION FOR FULL SERVICE INTELLIGENT MAIL® COMPLIANCE

Benefits

- Improve the efficiency of mail production and acceptance processes
- Analyze transportation options and select the most cost efficient option for your business
- Produce necessary eDocumentation and backup Paper Mailing Statements with Round Stamped Mailing Group ID when you submit eDocs with PostalOne!®
- Print USPS® Certified Intelligent Mail® 10/24 and 24-digit tray/sack tags and pallet placards
- Submit electronic postage statements for jobs not run through MailStream Plus® and may not have a Mail.dat file
- Manage PostalOne! release process and make your data PostalOne! compliant even if the original data is not
- A complete eDocumentation solution that meets numerous industry standards

OVERVIEW

Full Service Intelligent Mail Compliance

Pitney Bowes Business Insight has teamed with Window Book®, the leading provider of mailing electronic documentation (eDocumentation) solutions, to offer the DAT-MAIL MSP eDocumentation software product. DAT-MAIL MSP allows users of PAVE-certified pre-sort applications, including MailStream Plus®, to meet the eDocumentation requirements for Full Service Intelligent Mail compliance.

DAT-MAIL MSP offers a comprehensive set of features that make it easy to implement eDocumentation compliant to the USPS standards for First-Class Mail®, Periodicals, and Standard Mail. DAT-MAIL MSP makes it easy to change Mail.dat pre-sort information to minimize postage costs, reduce spoilage, and quicken the delivery of your mail.

Users of DAT-MAIL MSP are able to:

- Change estimated mail piece rates to the actual rates
- Split a single mailing across multiple mailings
- Change piece weights and quantities
- Enter Periodical advertising percentages
- Remove spoilage mail pieces
- Change drop ship origins and entry points

DAT-MAIL MSP is not just for mailers planning to implement the Full Service Intelligent Mail

program. Because it picks up where pre-sort applications leave off, all MailStream Plus users will benefit by improving documentation accuracy, labor savings, more efficient USPS acceptance and the management value of comprehensive reporting.

Part of a Complete Mailing Management System

DAT-MAIL MSP is just one of a set of solutions offered by Pitney Bowes Business Insight to enable our customers to effectively meet the requirements for Full Service Intelligent Mail compliance. These solutions offer flexibility and may be configured to your specific business processes thereby improving mailing operations.

These solutions include:

- MAIL360™ – USPS Intelligent Mail Barcode generation and management solution
- MailStream Plus® – USPS PAVE-certified pre-sort solution
- DAT-MAIL™ MSP – USPS eDocumentation generation, modification and submission solution

eDocumentation Solution to Meet Every Need

DAT-MAIL MSP is easy to implement and integrate with your current systems. Pitney Bowes Business Insight offers three eDocumentation solutions to meet your post-presort processing needs.

Solution 1: DAT-MAIL MSP

The DAT-MAIL MSP solution is most appropriate for mailers that prepare mixed weight manifests and do little drop shipping. Using DAT-MAIL MSP you can automate sack, tag, and pallet placard printing to various standards.

DAT-MAIL MSP users can automate the import of their Mail.dat files so that those files may be analyzed, modified, saved, and printed for further processing by the USPS. You may easily modify pre-sort information to accurately reflect final mailing through an intuitive user interface that lets you change any data including mailing dates, advertising percentages, and entry points. DAT-MAIL MSP allows users to create postage statements that more accurately reflect all of the changes to your mail and submit those statements to PostalOne!®.

Solution 2: DAT-MAIL MSP with Spoilage Management

The DAT-MAIL MSP with Spoilage Management solution is most appropriate for First Class and Standard Class mailers with mixed weight manifests. Not only does this solution include all of the robust features of the DAT-MAIL MSP solution, it also:

- Allows you to remove spoilage from your Mail.dat files. You can either manually enter or scan spoiled pieces, or automatically import spoilage information from an Intelligent inserter
- Allows your Postal Clerk to view and approve your manifests.

Solution 3: DAT-MAIL MSP with Toolbox and FAST™

The DAT-MAIL MSP with Toolbox and FAST solution is most appropriate for mail service providers who drop ship their mail pieces. This solution begins with the comprehensive set of features found in our DAT-MAIL MSP solution and also allows users to:

- Select the best mail entry point for individual and pooled jobs that will minimize transportation costs for mailings
- Create pallets for Standard Class and First Class mailings including the allowance for loose sacks on any created pallet
- Schedule drop ship appointments using FAST which is integrated using the USPS Web Service interface (USPS Mail.XML Certified).
